

COMMUNICATING FACE TO FACE

ZOOM

Zoom is a popular tool used for online workshops, trainings, meetings, and more. Anyone can use it - with a free plan, 100 people can join in a single call and you can schedule your call ahead of time. Free plans limit calls to 40 minutes, though, so many organizations have a paid account so meetings can last longer.

FACETIME

Facetime is a video chat built into any Apple devices, like your iPhone, iPad, or iBook. But it's only available for Apple users, so some of your friends may be left out of calls!

MESSENGER

Messenger works through Facebook and you can access it on your phone, tablet, or computer. It's a really accessible way to video chat with people you are already connected with on Facebook. While the mobile version allows users to chat with up to 50 people on a call, the desktop version only allows 8.

GOOGLE DUO

Google Duo is a video chat that is compatible with almost any mobile device and allows high-definition video calls up to 12 people.
